

Siima Sibirsky Super Adventure Pants

Size Chart

We take proper fit very seriously. We want you to have the best fit possible by providing you a complete range of sizes. These fit tips will help you decide on a fit that is comfortable and effective.

HOW TO MEASURE

To choose the correct size for you, measure your body as follows:

MEN

CHEST Use your tape measure and wrap around the chest about 2-inches below your armpit. Inhale.

WAIST Take a tape measure and wrap around waist below your navel but just above your hip bones.

INSEAM From your crotch junction, measure to the taper of your ankle. Remember that riding pants are longer than regular street pants to accommodate length and armor placement while in the riding position. A proper fit in riding pants will appear slightly long when standing.

WOMEN

CHEST A center-of-chest measurement, above and below the bust line will provide a good measurement.

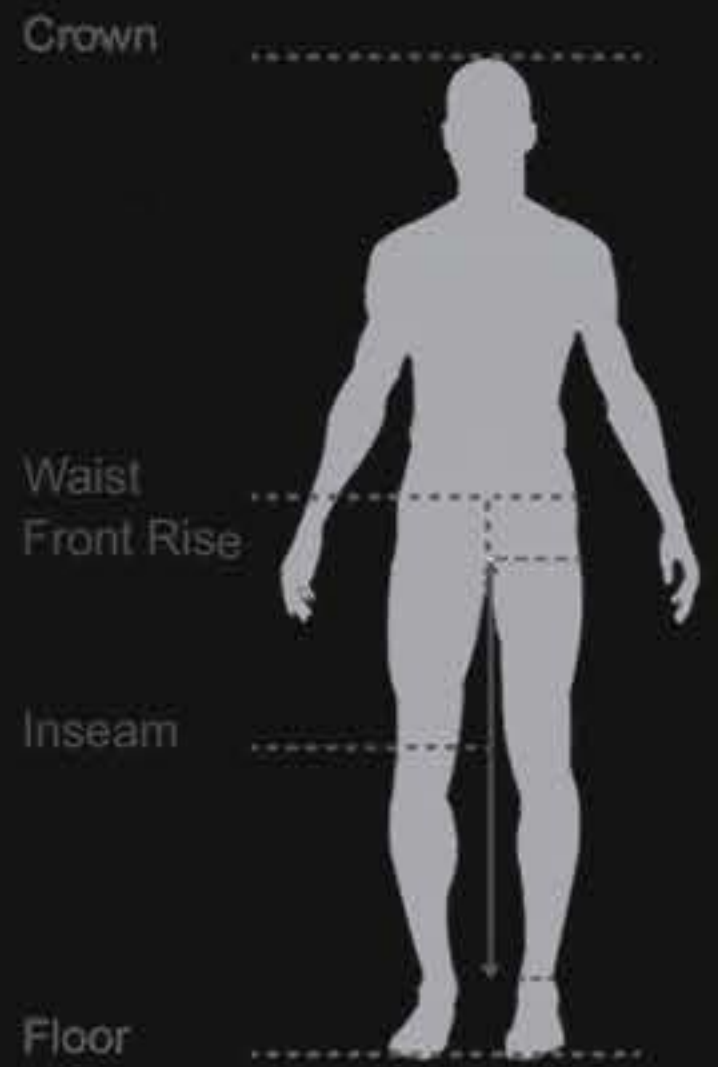

PANT Use a tape measure and wrap at the top of your hip bones. Then measure your waist, just below the navel. This combination can be seen on the fit chart. Using your standard street pant size is a good place to start.
